Personal Particulars

Age	:	41 years old	**Date of Birth**	:	11 August 1985
Nationality	:	Malaysia	**Gender**	:	Male
Marital Status	:	Married	**IC No.**	:	850811-08-5601
KWSP no:	:	16666051	**Income Tax No.**	:	SG 21167920080

Educational Background

1.Highest Education

Level : Bachelor's degree of Software Engineering (Honors)

Institution Name : Universiti Tenaga Nasional

Course duration : 4 years

Course start/end : **may 2005 till august 2008**

Institution Address : Km 7,Jalan Kajang-Puchong,
43009 Kajang,Selangor.
Tel:03-89212020

1.Secondary Education

Level : SPM

Institution name : Sekolah Menengah Kebangsaan Felda Besout

Institution address : Felda Gunung Besout 1,
35600 Sungkai Perak.

2. Primary Education

Level : PMR

Institution name : Sekolah Menengah Kebangsaan Felda Besout

Institution address	:	Felda Gunung Besout 1, 35600 Sungkai Perak.	**Graduation Date**	:	October 2000

Level	:	UPSR	**Grade**	:	3A,1B,1C
Institution name	:	Sekolah Kebangsaan Felda Besout			
Institution address	:	Felda Gunung Besout 1, 35600 Sungkai Perak.	**Graduation Date**	:	October 1997

Availability	:	1 month notice	**Transport**	:	Car,Motorcycle

Top Skills

Skill	Years	Proficiency
MS Office	>10	Advanced
Java(J2EE, J2EE android)	>8	Intermediate
PHP & Mysql Database	>4	Intermediate
Oracle Database(using OCI8,ADODB5 JDBC)	>6	Intermediate
DB2 database	>4	Intermediate
IBM Informix database	>3	Intermediate
JSP Jstl taglib front end	>1	Intermediate
VueJS frontend	>2	Intermediate
nodeJS frontend (run command npm run build)	>1	Intermediate
angular1 JS	>1	Intermediate
Spring 4 framework	>5	Intermediate
Spring boot 1.4.2 (build in tomcat 8 engine)	>3	Intermediate
Spring Quartz scheduler	>1	Intermediate
Spring batch scheduler	>1	Intermediate
Gitlab subversion command	>4	Intermediate
Centos 7 0S LINUX	>3	Intermediate
RESTful API(support CRUD,JSON format) and WSDL web service	>1	Intermediate
Apache dubbo (open source java RPC framework)	>5	Intermediate
Apache tomcat 8	>2	Intermediate
Nginx web server(reverse proxy)	>2	Intermediate
Jenkin(auto deployment tool based on latest selected gitlab branch)	>2	Intermediate
ORM Mybatis 3 (CRUD)	>3	Intermediate
ORM hibernate 4(.xml hbm file or java persistence @onetoMany)	>2	Intermediate
Java JUnit unit testing framework	>3	Intermediate
Java Mockito unit testing framework	>2	Intermediate
Android native apps using gradle project,android studio tool	>2	Intermediate
Android hybrid apps using gradle project,android studio tool	>2	Intermediate
Maven[build automation tool](pom.xml library dependency jar update)	>2	Intermediate
Gradle[build automation tool](dependency.gradle jar library)	>2	Intermediate
Nexus server-repository for own java jar library	>2	Intermediate
Disconf server-hold .properties configuration file.	>2	Intermediate
Jodis - Java client for codis.load balance user session	>2	Intermediate
Redis 2.8- load balance user session	>2	Intermediate
Codis- load balance user session	>2	Intermediate
jasper Reporting tool	>2	Intermediate
Crystal report Reporting tool	>2	Intermediate
PHP OOP GENAMO(generic amplified framework)	>2	Intermediate
PAYPAL(Payment gateway API) (Using IPN)	>2	Intermediate
GIS GOOGLE MAP API	>2	Intermediate
AWS ECS	>2	Intermediate
FACEBOOK GRAPH API&FQL(facebook query languge)	>2	Intermediate
MYCARD FINGERPRINT READER SDK API(IRIS CORPORATION SDN BHD)	>2	Intermediate

Major core subjects taken in UNITEN, Bachelor's degree of Computer Science (Software Engineering) (Honors)

Subject	Grade	Subject Description
Operating System Concepts(OS)	B	This course taught me to understand the fundamental concepts of operating systems at introductory level,the terminologies associated with operating system concepts,the general concepts and algorithms used inprocess management, memory management and I/O systems
System Analysis and Design(SDLC)	B-	This course taught me all activities in analyzing, designing and developing information systems including the management, specification, evaluation, security and also techniques used in software maintenance. It also introduces the latest object-oriented approach to systems analysis and design.
Object Oriented Programming(JAVA)	B-	This course provided me with sold and clear understanding of object oriented methodology and programming using JAVA.I learnt of how to build my own object classes and use it in the design, implementation, testing and debugging of an object-oriented systems.
Software testing and validation	A-	This course examines different verification and validation approaches that are capable of providing us with evidence of software quality. This courses also teach me technique and standards about testing process.
Software project management	A-	This course taught me fundamental concept as well as the components of software development context and project management. I learned how to use primavera software and Microsoft project software effectively.

Academic reference

Name : Mr. MohdFaizal Ahmad Sazalli

Telephone No : 03-89212020 ,Ext:1128

Email : mohdfaizal@uniten.edu.my

Position : Academic unit officer, UNITEN

Institution Name : Universiti Tenaga Nasional

Additional Info

NON ACADEMIC ACTIVITIES in UNITEN:

*Member of KELAB WAWASAN, semester 2, academic year 2007/2008.

*Member of Uniten SIFE Club, semester 1, academic year 2007/2008.

*Member of Uniten Computer Club(UCOM), semester 2, academic year 2007/2008.
(Advisor UCOM Club MrAzlan bin Yusuf (03-89212020 Ext:2368, Email: azlany@uniten.edu.my

*Exco Member of PersatuanPembimbingRakanSebaya, semester 2, academic year 2007/2008.

*Attend 'The Work Permit' Seminar 2008, semester 2, academic year 2007/2008.

PERSONAL TRAITS AND ATTITUDE:
* Responsible and excited to learn and apply new knowledge.
* Hard working, creative and committed to achieve and accomplish the task given.
* Excellent cross-cultural communication skills
* International living experience and regional exposure
* Passion for continuous learning and personal growth
* Highly motivated and driven, with strong desire to excel
* Be willing to work over time.
* Be willing to work in group.
* Had strong 'soft skill' consist of communication skill and leadership skill.

ADDITIONAL SKILL
*Had some knowledge and experience to develop non commercial system based on web based application .
*Be familiar with PHP script, JAVA script and Mysql database.

CAREER AMBITION:
*For short term aim, i want to hold permanent jobs or equivalent jobs after i complete my industrial training.
*For long term aim, i want to hold professional jobs level in my discipline such as software engineer, network engineer System engineer and more related jobs in IT field.

COMPANY NAME	TASK DESCRIPTION
Sands Consulting SdnBhd(574596-M) 11-2-2A, Jalan Medan PB2A, Medan PB2, Seksyen 9, Pusat Bandar Bangi, 43650 Bandar BaruBangi, Selangor Darul Ehsan. Tel: 03 – 8925 3245 Fax: 03 – 8925 0805 Email: info@my-sands.com Position: php developer START WORK: 8/2008 END WORK: 12/2010 Start salary:RM1900 Last salary:RM2500	Full Application development SDLC process: 1.Collect user requirement from client to determine workflow, scope of project. 2.Draw database diagram, DFD(data flow diagram)&ERD(entity relationship diagram). 3.Start development phase using OOP PHP MVC framework. 4.Deploy web application to the server using CENTOS 6.4 linux distribution. 5.Conduct UAT(ucer acceptance test) and get feedback from client. 6.Involved in continuous maintenance phase as requested by client. Project involved: 1.Wedding management system belong to Pahang government state. -System to manage wedding record from all stakeholders such as counter clerk, officer, wedding registrar. -The process involved to register pre-wedding,wedding,divorce,second wedding to database Keyed in by counter clerk and submitted by officer to approve and pass to registrar to approve and return to counter clerk to print marriage identification card. -the graph reporting involved using enterprise fusion chart API.

Creative World Industries Sdn. Bhd(548234 U). No. 28, JalanZirkon F, 7/F 40000 Shah Alam, Selangor Darul Ehsan. Telephone : 03-55195773 Facsimile : 03-55124208 Position: php developer START WORK: 1/2011 END WORK: 12/2012 Start salary: RM2800 Last salary:RM3800	Full Application development SDLC process: 1.Condung SRS(software requirement spe),Collect user requirement from client to determine workflow, scope of project. 2.Draw database diagram, DFD(data flow diagram)&ERD(entity relationship diagram). 3.Start development phase using JSP,Java language. 4.Deploy web application to the server using CENTOS 6.4 linux distribution. 5.Conduct UAT(ucer acceptance test) and get feedback from client. 6.Involved in continuous maintenance phase as requested by client. Project involved: **1.Land management system belong to Selangor government state.** -System to manage land record from all stakeholders such as developer, local authorities, legal firm and home buyer for fla ,codomium house. -The process involved to register legal firm to database, register house buyer, approve the application submitted by residents,developers to apply new or change existing land record in land office and in the end phase will come out new land grant to print to customer. -System also catch the particular from mycard reader who collect the land grant document

	either land owner,lawyer,runner. -I involved in integrate API SDK for hardware mycard fingerprint reador belong to IRIS corporation in web based system to catch data from mycard such as IC number,name,address,postcode,image and thumb image. **2.IPGM(InstitutPerguruan Malaysia) college management system.** -System to register teacher record,student subject record,classrecord,student marks and CGPA,attandance record and many more. -The stakeholders involved such as teacher,students,dean,deputy dean and officer.

KONS ORTIUM J AYA SDN BHD (12 0381-M) Ad dress: BANGUNAN C, PERE MBA SQUARE, SAUJANA RESORT, SECT ION U2, SHAH ALAM, SE LANGOR DARUL EHSAN START WORK: 1/2013 END WORK: 12/2015 Position:JAVAdevelope r Start salary:RM4200 Last salary:RM5500	Project involved: 1. Etanah(Real Estate Property Management Software) for Melaka governmentstate -Involved in PESAKA module development for JAVA web services integration between etanah system and vendor(hla-group berhad) using JAVA axis2 library. - Involved in table restructuring, cleaning as requested by client and vendor in e-tanahmelaka oracle 11G database. -Understand,writing MODEL JAVA hibernate framework architecture for etanah Melaka. 2. Portal for EtanahNegeri Sembilan government state -Involved in develop and maintain the portal using java web logic engine portal. 3. Portal for Etanah Melaka government state -Involved in develop and maintain the portal using java web logic engine portal. -Involve in portal training, guide user to navigate portal. -Resolved in browser incompatibility issue as requested by users. 4. Portal E-Bayar(payment gateway forReal Estate Property Management system) for Negeri Sembilangovernment state -Involved in payment gateway API integration between portal E-Bayar and vendor payment gateway(Larva system SDN BHD). -Involved in testing tax payment from new public registered till payment successfully implemented. -resolve programming error as requested by clients immediately. -Involved in develop new design portal version for both mobile and desktop compatible version using progressive HTML template. 5.Trade promotion management system belong to MATRADE -this system to register Malaysia and foreigner exhibitor and details of event conducted by Matrade. -developed using java spring framework and hibernate query language(HQL) -using IBM INFOMIX database -using bootstrap library for GUI mobile responsive

DEVWIZ SDN BHD

SA-20-03, Pangaea Paragon
Persiaran Bestari, 63100
Cyberjaya, Selangor, Malaysia
START WORK: 1/2016
END WORK: 12/2020

Start salary:RM6000

Last salary:RM7000

1. Develop **TM archival system** belong to TM Berhad, Tm tower, bangsar, kuala Lumpur. Maintain, enhance existing system, Cosec module(file,directory management),news mangement and make documentation about code program we developed ,make documentation about installation, configuration TM archival system source code from GITHUB repository into local PC also how to deploy(export to .war file) source code system from local pc into jbos production server console.This system use JAVA hibernate,spring,stripe framework and database oracle 10g.TM archival system is billing system used by tm staff to generate monthly bill to send to client who subscribe tm product.

(a). Develop programming training module of TM archival system for TM programmer staff how to use GITHUB and develop new module using stripe, spring, hibernate framework architecture for 2 days training. The training outline as :

1. Explanation of roles of jump host, web servers, Jboss application servers, and database.
2. Eclipse user interface
3. Basic GIT operations:
    a. Creating branches – pushes new branches to the repository
    b. Switching branches
    c. Pull, or fetch and merge
    d. Commit changes
    e. Push changes to branch
4. Structure of the projects (source codes and resources):
    a. Web application project
    b. Separation of model, view and controller in web application projects
    c. Batch Java application project
5. Explanation of third party libraries/tools
6. Deployment process
    a. How to build
    b. configure settings in configuration files (per environment),
    c. How to create deployment file (WAR file)
    d. How to deploy
7. Frameworks used in the system:
    a. Stripes framework
    b. Hibernate framework
8. The relationships of JSP to ActionBean to Service to DAO
9. View (Presentation) level
    a. HTML
    b. Modify JSP to add/edit static information
    c. Modify CSS to change the style used in the system
10. Model level
    a. Modify service declaration and implemention
    b. Modify DAO declaration and implementation
11. A simple exercise to create an oline page to list users per workgroup (new JSP and ActionBean)

(b) Develop special tool for java hibernate community generally and tm archival project specifically to generate hibernate,spring,stripe code generator from existing oracle table column created in advance.if you want to see how it work,the tool available at http://jukisoft.com/dev/juki_mvc_generator_java_database_tm_development2/

2. Develop **1GFMAS Sistem Pengkosan (MyCost).** 1GFMAS Costing System (MyCost) provides a process oriented, cross functional view of overhead, in relation to the traditional location oriented view provided by Cost Center Accounting. MyCost use java grail,groovy framework. The reporting I used is jasper report.Databased used is MSSQL(Microsoft SQL server 2012).

3. Develop new module OSHA,KPI module in exiting ERML system(Rangkaian Maklumat Ladang) belong to Felda Prodata Sdn Bhd in Menara Felda ,Platinium Park KLCC,kuala lumpur.Participate in full cycle of SDLC from getting requirement(physical form) from client,draw DFD,ERD,SRS,database diagram(table relationship

	mapping),developing early prototype and present to client,merging code from develop branch to master branch using GITLAB,deploy to staging server,deploy to production server and continuous support in software waranty period. OSHA and KPI module consist of data entry ,processing data by multi level approval process such as manager level,assistant manager level,estate supervisor until generate customized report as desired in by clients in signed SRS.Play with big data using existing MYSQL database record for this ERML system.
LAPASAR SDN BHD Mezanine 2 (M2), L2-W2, 12, Persiaran Astana / KU 2, Bandar Bukit Raja, 41050 Klang, Selangor START WORK: 12/2020 END WORK: 4/2025 Start salary:RM8000 Last salary:RM10500 Reason for leaving: Focus on business	iBox Merchant android apps developed using front end: VueJs,Mint UI JS component,NodeJs(nginx web server) and back end: spring boot 1.4.2,spring 4 framework and ORM MYbatis 3 framework,database oracle 11.Each @service had different IP address. Communication between server using RESTFUL API(JSON CRUD between front end and back end service) and @RPCService(apache dubbo RPC framework[embedded user session load balancer using codis,jedis,redis,zookeeper tool]).For deployment tool using jenkin 1.Develop iBox Merchant android apps. The iBox Merchant used by merchant to receive payment from customer to pay to merchant account(wechat API or,touchNGo,tatupay,Boost,Alipay,Mcash,Bpay,Tatupay) using QR code and customer account(wechat API or,touchNGo,tatupay,Boost,Alipay,Mcash,Bpay,Tatupay) will be deducted each time transaction implemented by scanning QR code from merchant. Other features to manage sales record, generate sales report, top up account, withdraw account, transfer account and also marketing campaign using voucher code, push notification marketing, manage staff, manage customer record, manage customer loyalty bonus. 2.Develop lapasar B2B ecommerce system. Digitize procurement processes among GLC company in malaysia such as PETRONAS,PLUS,KENANGA,TM,TNB etc. Lapasar use PHP code igniter 5 framework based PHP 7 for back end. use VueJs front end.Use database MYSQL 8 and use 2 mysql replication server and lots of PLSQL such store procedure,trigger,events,function to optimize sql query.Lots of system integration between lapasar and other third party system such shopify,odela,iboxchain,kenanga system using code igniter web service rest API. 3.Develop php codeigniter framework code generator https://php-ahmadmarzuki.wasmer.app/ (convert mysql table structure to php controller,model,view code) how to use code generator click here: https://github.com/marzuki234/hospital-patient--management-api/blob/master/cover_letter.pdf 4.Develop java spring boot code generator https://marzukijavaaispringbootcodegenerator.wasmer.app/ (convert mysql table structure to java controller,model,service,,serviceImpl,DTO,repository code) how to use code generator click here: https://github.com/marzuki234/hospital-patient--management-api/blob/master/cover_letter.pdf

Expected Salary: RM5000 to 12000 depend your company budget, programming test result conducted by your company, interview, negotiation, discussion result and how effective, useful my java spring boot code generator to your company to reduce development time
